

2011.10.04

AVR-1

V01

PLEASE READ BEFORE PURCHASING UPGRADE!

**Important Changes to Operation and System
Configuration with November 2011 Upgrade**

DENON

**AVR-5308CI/5308CI(A),
AVP-A1HDCI/AVP-A1HDCI(A)
Upgrade**

I : Important notice about changes to units after the upgrade has been performed.

- 1) All System Configuration settings stored in the unit will be cleared by this upgrade.

For example, all settings listed below will be deleted.

- ① Information related to Auto setup (including Audyssey Pro)
- ② Installer setup data
- ③ Personal Memory Plus
- ④ Network connection settings
- ⑤ Quick Setup information

Since all above settings will be deleted, customers will need to reconfigure the unit upon completion of the upgrade: For Audyssey Pro Calibration, your Custom Integrator will need to be called for recalibration.

- 2) A new Setup Microphone (DM-A409) is included with this upgrade.
As part of the upgrade, a new Audyssey calibration microphone is included; Please use this microphone to perform the Audyssey calibration after the unit has been upgraded.
- 3) Instruction manual is provided by CD-ROM with an interactive function.
- 4) No warranty is implied or extended with this upgrade.
- 5) Once the upgrade has been performed, end user will have to preform the System Setup as if the unit were brand new. All user settings will be deleted upon completion of the upgrade.
- 6) All prior factory firmware updates are included in this upgrade.
 - ① DENON LINK 4th
 - ② Audyssey Dynamic Volume.

II : Features and System functionalities that will be removed and/or changed by this upgrade:
